

Installation et configuration du framework Symfony

I. Création d'applications Symfony avec Composer

Installation composer.phar :

```
php -r "eval('?'>'.file_get_contents('http://getcomposer.org/installer'));"
```

Installation symfony :

```
php composer.phar create-project symfony/framework-standard-edition my_project_name "2.8.*"
```

```
php composer.phar create-project symfony/framework-standard-edition my_project_name
```

Création d'applications Symfony

```
php -r "file_put_contents('symfony', file_get_contents('https://symfony.com/installer'));"
```

```
php symfony new my_project_name
```

Welcome to Symfony 3.3.10

Your application is now ready. You can start working on it at:

C:\xampp\htdocs\my_project_symfony3\

What's next?
